first time ever

a computer assisted semen analyser
that includes You...

CASA & You

world's most comprehensive CASA

now stay connected
through wi-fi

a ⟲ Sperm Processor product...

---

introducing Expert Mode

where the *technology* helps you go beyond *technology*

World's every CASA faces technology limitations as microscopic images are 2 dimensional, there are variations in staining, setup constraints etc.
SpermSoft overcomes all these limitations by its Expert Mode where computer truly assists You by presenting all the data and let you use your expertise and record your interpretation with ease.

patent pending technology

SpermSoft is par image processing. It's not just a software but a complete stand-alone system that will surely be a backbone of your andrology lab...

SpermSoft is built using latest hardware technology and talking about software, widest range of tests is covered in SpermSoft.

Soft copy reports is one of the unique features of SpermSoft which includes **field images, videos & data analytics** like **comparisons** with previous findings, with WHO parameters etc.

SpermSoft comes with wi-fi connected tablet, so you can monitor or give your expert input to lab technicians right from your desk

---

SpermSoft is a product developed by **Sperm Processor**, a renowned name in the field having vast presence in global market.

Our subject expertise enabled us to come up with a CASA that has every feature thoughtfully designed considering every minute detail and making it the most practical CASA.

We serve a wide range of products for lab andrology right from SFT Kits, instruments, accessories, plasticwares & disposables, hands-on training to complete Lab Setup...

You can thus always be assured of uninterrupted availability of all supportive kits & accessories required for CASA and be assured of quality.
